

Hands-On Prerequisite Python in AI

Exercises 06

Deadline: 2023 3 May

Score: 300

2023 29 April

Question 1

300

Write the products management project as follows.

1. Product information includes name and price.
2. Use list to save information
3. We do not have duplicate product name
4. This project includes sections for adding, deleting, editing, detail and searching by product name.
6. For the detail section, display the total number of products, the average price, the most expensive and cheapest product.
5. The program should continue until the user enters "exit".

Thanks

Good Luck!
